

Request form for increase of entry/exit capacity

Capacity increase within the framework of existing capacities

With this form you request a capacity increase in the network of GASCADE Gastransport GmbH. Your request is not a claim for a network expansion or consideration in the network development plan according to § 15a EnWG. In the internal review, relocation options are considered within the framework of existing capacities. If we can increase the marketable capacity at the requested network point, we will make this capacity available to all market participants. We will provide information on the marketable and free capacity in good time in advance of the capacity allocation procedures and as part of the general publication obligations.

Please fill out this form and send it to operations@gascade.de

At the following network point, the need for a capacity increase arises:

Network point name	Direction (entry/exit)

Please specify the capacity product for which you are requesting an increase, and if necessary, including the period of the increase:

Capacity product [FZK, DZK, bFZK, uFZK]	Amount [kWh/h]	Increase from (dd.mm.yyyy)	Increase to (dd.mm.yyyy)

If the capacity is increased as requested and allocated via auctions, the capacity shall be included accordingly in all standard capacity products falling within the requested period.
