Exhibit J
Matching Procedure

EXHIBIT J

To the Interconnection Agreement between
GASCADE Gastransport GmbH and Gasunie Transport Services B.V. for the Interconnection
Point Bunde / OSZ

Article 1: Aim of the Exhibit:

The Parties as TSOs agree upon this Matching Procedure in order to facilitate the efficient and reliable operations and allocation at the Interconnection Point. The Parties shall ensure that the agreements with their respective Shippers do not contradict to this Matching Procedure.

Article 2: Definitions

Capitalized terms have the meaning given to them in the main body of this Agreement unless explicitly stated otherwise in this Exhibit J. Additionally the following definitions shall be used for the purpose of this Matching Procedure:

Matching Procedure:
means this Exhibit J;

GTS Pipeline:
means the Gas Transmission Grid of GTS;

DELORD:
means the daily call-up message of the pipeline operator, being the TSO initiating the matching process;

DELRES:
means the daily call-up message of the pipeline operator, being the TSO performing the matching process. This TSO is responsible for the so called "lesser of rule".

MIDAL Pipeline:
means the pipeline network operated by GASCADE.

Article 3: Indication of flow direction

1. It is agreed between the Parties that a qualifier will be applied to indicate the intended direction of Nominated quantities. The qualifier Z02 will mean input quantity and the qualifier Z03 will mean output quantity. In practice this implies that:

- a. On the messages from GTS to GASCADE all Nominated quantities intended to flow from the GTS Pipeline into the MIDAL Pipeline shall be output;
- b. On the messages from GTS to GASCADE all Nominated quantities intended to flow from the MIDAL Pipeline into the GTS Pipeline shall be input;
- c. On the messages from GASCADE to GTS all Nominated quantities intended to flow from the MIDAL Pipeline into the GTS Pipeline shall be output;
- d. On the messages from GASCADE to GTS all Nominated quantities intended to flow from the GTS Pipeline into the MIDAL Pipeline shall be input;

2. A quantity shall always be a positive quantity but in the unlikely case that a quantity will be preceded by a minus sign, the Parties agree that the quantity is meant to be a positive quantity.

EXHIBIT J

To the Interconnection Agreement between
GASCADE Gastransport GmbH and Gasunie Transport Services B.V. for the Interconnection
Point Bunde / OSZ

Article 4: General Provisions

1. Any reference to time in messages shall be in UTC. For the avoidance of doubt, in case of a change from wintertime to summertime or vice versa a Day consists of 23 respectively 25 hours.
2. All messages exchanged, according to this Matching Procedure, shall use the unit kWh for energy.
3. Any written information to be given under this Matching Procedure shall be transmitted using the document layouts and the reliable telecommunication means agreed between Parties.
4. The transmission of the data necessary for the day-to-day operation shall be performed by means of an Edifact/Edigas compatible protocol.
5. The (coded) name description of a Shipper may contain a prefix, consisting of a number of characters, for identification purposes. It is agreed between Parties at the operative level which prefix will be exclusively used by a Party.

Article 5: Matching Procedure

1. Matching shall be performed by Parties in order to check whether the Hourly Quantity nominated by a receiving Shipper and to be made available by a delivering Shipper at the Interconnection Point is equal to the Hourly Quantity nominated to be made available by such delivering Shipper and to be off taken by such receiving Shipper.
2. In case the Hourly Quantity nominated to be received is equal to the quantity nominated to be made available, matching is performed and the Hourly Quantity is defined as the Confirmed Quantity for the corresponding delivering – receiving pair of Shippers.
3. Taking into account that the direction of the Nomination is equal and in case the Hourly Quantity nominated to be received, is different to the Hourly Quantity nominated to be made available, it is agreed between the Parties that the Confirmed Quantity for the corresponding delivering – receiving pair of Shippers shall be equal to the minimum of the Hourly Quantity nominated to be received and the Hourly Quantity nominated to be made available (the lesser rule).
4. In case the receiving Shipper uses a (coded) name description for the delivering Shipper that does not correspond with the actual name description for the delivering Shipper, it is agreed between the Parties that the Confirmed Quantity for the corresponding delivering - receiving pair of Shippers will be equal to zero.
5. In case the delivering Shipper uses a (coded) name description for the receiving Shipper that does not correspond with the actual name description for the receiving Shipper, it is agreed between the Parties that the Confirmed Quantity for the corresponding delivering - receiving pair of Shippers will be equal to zero.
6. In case Shipper A nominates an Hourly Quantity to be received from Shipper B whilst Shipper B nominates an Hourly Quantity to be received from Shipper A, it is agreed between Parties that the Confirmed Quantity for the corresponding delivering - receiving pair of Shippers will be equal to zero.

EXHIBIT J

To the Interconnection Agreement between
GASCADE Gastransport GmbH and Gasunie Transport Services B.V. for the Interconnection
Point Bunde / OSZ

7. In case Shipper A nominates an Hourly Quantity to be delivered to Shipper B whilst Shipper B nominates an Hourly Quantity to be delivered to Shipper A, it is agreed between Parties that the Confirmed Quantity for the corresponding delivering - receiving pairs of Shippers will be equal to zero.
8. GTS shall send the DELRES. GASCADE shall send the DELORD and GASCADE shall adjust the Physical Flow accordingly.
9. If a constraint affecting a Shipper entitlement or a change in such a constraint is experienced by a Party, the relevant Party shall issue a DELRES or a DELORD as the case may be. The other Party may respond by issuing a DELORD or a DELRES as the case may be. Such TSO matched quantities shall be defined as the new Confirmed Quantities. Each TSO shall inform his respective relevant Shippers of such new Confirmed Quantities. For the purpose of the Agreement and this Exhibit J constraint is according to definition of EASEE gas CBP 2005-003/01 "Constraints".

Article 6: Exceptional event

In case an Exceptional event occurs and the Parties are not able to apply the Matching Procedure, they shall contact each other in the most appropriate way with a request for an immediate steering adjustment. The quantities to be allocated to the Shippers for such hour(s) will be defined in mutual agreement between the Parties based on the allocation rules (as laid down in Exhibit I).

Article 7: Edig@s type DELORD

1. GASCADE shall send immediately after 14:00 hours LET but not later than 14:45 hours LET on each Day a DELORD to inform GTS about the quantities called up on the following Day at the Interconnection Point.
2. The DELORD shall contain the Hourly Quantities called up at the Interconnection Point, split by delivering - receiving pair of Shippers. The quantities called up at the Interconnection Point shall have the flag P (processed) which means that GASCADE will be able to transport these quantities into or away from the Interconnection Point.
3. If Shippers send revised Nominations during the Day, GASCADE sends a revised DELORD not later than closely after the next full hour stop, if a processed quantity or a Confirmed Quantity called up at the Interconnection Point is revised.
4. GASCADE shall send a revised DELORD as soon as possible at any time during the Day in the situations of a constraint which is affecting a Shipper entitlement or when a change in such a constraint is experienced by either Party as a TSO.
5. In case a revised DELRES from GTS does not comply with the latest DELRES or revised DELORD from GASCADE, GASCADE shall, if needed, send a revised DELORD.
6. GASCADE will send the DELORD at the latest 75 (seventy-five) minutes before the Confirmed Quantities becomes effective.
7. All quantities are specified in kWh/h for energy.

EXHIBIT J

To the Interconnection Agreement between
GASCADE Gastransport GmbH and Gasunie Transport Services B.V. for the Interconnection
Point Bunde / OSZ

Article 8: Edig@s type DELRES

1. As soon as possible after having received a DELORD from GASCADE and before 15.30 hours LET, GTS shall issue a DELRES to inform GASCADE about the Confirmed Quantities to be made available at the Interconnection Point on the following Day.
2. The DELRES shall contain:
 - a. Indicated by a flag C: the hourly Confirmed Quantities to be made available at the Interconnection Point, split by delivering - receiving pair of Shippers; and
 - b. Indicated by a flag P: the hourly processed quantities indicating the Nominated quantities for which GTS is able to transport into or away from the Interconnection Point, split by delivering - receiving pairs of Shippers.
3. GTS shall send a revised DELRES in the following situations:
 - a. after having received a revised DELORD from GASCADE during the Day or
 - b. an hourly processed quantity is revised or
 - c. an hourly Confirmed Quantity is revised
 - d. when Shippers send during the Day revised Nominations, GTS buffers the revised Nominations until the next full hour stop in order to update the hourly processed quantity or the hourly Confirmed Quantity.
4. GTS shall send a revised DELRES as soon as possible at any time during the Day in the situations of a constraint which is affecting a Shipper entitlement or a change in such a constraint is experienced by either Party as a transport operator.
5. The DELRES sent by GTS shall be valid if received by GASCADE at the latest 30 (thirty) minutes before the new Confirmed Quantities become effective.
6. All quantities are specified in kWh for energy.

Article 9: Single Sided Nominations

Single sided nominations according to the EASEE-gas Common Business Practice 2014-001/01 "Harmonisation of the Nomination and Matching Process for Double-Sided and Single-Sided Nominations", as may be amended from time to time, is implemented in the matching process between GASCADE and GTS. GASCADE being the active system operator shall forward received single-sided nominations immediately after h0 (Shipper deadline) but not later than h0+15min. The information towards GTS should be sent by a single-sided exchange notice (DELORD subtype = ANC). The forwarding of single-sided nominations will be operated on basis of hourly directional quantities.

Article 10: Operation and monitoring of Physical Flow

Parties shall cooperate in order to execute the Physical Flows with the best possible reliability and accuracy.

Point Bunde / OSZ

Article 11: Paramount Guidelines for Matching Procedure

The content of this Matching Procedure is based on the paramount regulations of the latest relevant EDIGAS and EASEE-gas CBP Guidelines.

In case the rules of this Matching Agreement are or become inconsistent with the valid EDIGAS and EASEE-gas Guidelines, the Parties shall discuss possible solutions to act in accordance with the EDIGAS and EASEE-gas Guidelines.
