TAR NC	Description	Information or Link	
	Information to be published before the annual yearly capacity auction for tariff p	period 2024	
Art. 29	Information for standard capacity products for firm capacity (reserve prices, multipliers, seasonal factors, etc.)	See the pricelist of GASCADE Gastransport GmbH effective from 1.1.2024	
a)		For the justification of the level of multipliers, GASCADE refers to the Fede Bundesnetzagentur [BNetzA]) Decision BK9-22/612 (Decision 'MARGIT 20	
Art. 29 b)	Information for standard capacity products for interruptible capacity (reserve prices and an assessment of the probability of interruption)	See the pricelist of GASCADE Gastransport GmbH effective from 1.1.2024	
		The BNetzA determined the discounts for interruptible capacity at intercon (<u>Decision MARGIT 2024</u>) Annex I. The methodology to calculate these of decision.	
		The methodology to calculate discounts for interruptible capacity at other that points, is specified in BNetzA decision BK9-18/608 (" <u>BEATE 2.0</u> ") dated 1 interruption is derived from the data of the last three gas years of the respect the ratio between the sum of interrupted capacity booked on an interruptible k capacity marketed on these days. The probability of interruption is rounded safety margin of 10% points (which represents the forecast uncertainty) at the L-gas network and of 20 % points at points other than inter-connection points.	
		According to the BNetzA decision <u>MARGIT 2024</u> the applicable discount co at interconnection points regardless of the product duration.	
		There has been no interruption at the points according to <u>BEATE 2.0;</u> the points amounts to 20% in the H-gas network.	
		For the discount for interruptible capacity in the calendar year 2024 we refe
