

Appendix GTC 1: Oversupply/undersupply method applied

valid for services as of 1 October 2014

Appendix 1: Oversupply/undersupply method applied

1. Method: Monthly method
Meters are read on a rolling basis. The transmission system operator divides consumption quantities into individual months. To determine oversupply/undersupply amounts, consumption quantities – appointed for the billing month – are compared against the amounts allocated to the balancing group/sub-balancing account for the corresponding period. Changes of supplier are factored into the allocation and quantity period measurement up to the day.
2. Billing type: monthly
3. Billing period: monthly
4. Fee: the monthly price for compensation energy equals the mean average of the positive and negative prices for compensation energy published for the gas day of the respective month
5. Weighting method: not applying
6. Invoicing schedule: monthly
7. Preparation of oversupply/undersupply billing statement together with network usage billing: no
8. Invoice delivery: by mail
